

## Chalkboard Relay

Level: 2<sup>nd</sup> grade and up

Objective: In this lesson, students will be able to integrate math and physical education by the doing addition facts during a relay.

Equipment: Chalkboard or Whiteboard  
Chalk or White Board Markers

Procedures:

- 1) Divide your class into two teams or more.
- 2) The first player on the team runs to the chalkboard and writes a number on the chalkboard.
- 3) The first player returns to the start line and tags the second player.
- 4) The second player then writes another number directly under the number of the first player's.
- 5) This continues with each member of the team.
- 6) The last member has to add up all of the numbers.
- 7) The first team to finish receives one point.
- 8) All teams that correctly finish their problem receive two points.

Assessment: Team Points

Reminder: Remind students to write numbers clearly so their team members will be able to read them.
